PROFESSIONAL SUMMARY

Senior PM with 5 years in B2B enterprise software. At ServiceNow, I own all GenAI and agentic AI capabilities for Customer Success—built a 19-agent system that drove 10+ competitive wins against Gainsight and helped grow ACV from \$18M to \$70M. Took Plus tier subscriptions from 0 to 120 accounts by shipping AI features worth paying more for. Before product, I built data pipelines at a YC startup. I work best at the intersection of AI, data, and enterprise workflows.

EXPERIENCE

ServiceNow Software Development India Private limited, Remote

Feb 2025 - Current

Sr Inbound Product Manager

- Owned GenAI and agentic AI capabilities across CSM, building differentiated features that became primary competitive advantage—drove 10+ enterprise displacement wins against Gainsight and Totango, contributing to 290% ACV growth.
- Defined product vision and requirements for multi-agent AI system (19 agents across 5 workflows), replacing manual CSM processes that consumed 200+ hours/week; scaled to 120 enterprise accounts in 12 months from zero.
- Drove 0→120 enterprise upgrades to Plus tier by shipping GenAI and agentic capabilities compelling enough to justify premium pricing—AI agents and automation became key reasons customers upgraded from base TPSM.
- Prioritized renewal risk automation over manual reviews based on CSM time-study data, reducing operations 40% (200+ hrs/week) while keeping human-in-loop for high-risk signals requiring judgment.
- Built cross-application workflows connecting Customer Success Management with SPM, Sales and Order Management, and Digital Product Release, enabling end-to-end customer lifecycle visibility across the ServiceNow ecosystem.
- Built analytics framework with auto-refresh dashboards tracking adoption across 5 products and 500+ enterprise users.
- Led integrations with Salesforce, Microsoft Dynamics, and GenAI APIs, expanding platform ecosystem reach by 3x.
- Shipped ACL framework and least-privilege controls that prevented unauthorized data access and cross-scope leakage—directly addressed security concerns blocking deals with regulated enterprises in banking and finance sectors.

Inbound Product Manager

May 2023 - Feb 2025

- Built Customer Success product from inception, defining core workflows adopted by 300+ enterprise accounts.
- Enabled 3x customer base growth (120→380 accounts) by closing top 5 feature gaps identified in lost deal analysis, including value delivery framework, health scoring framework that became must-have in enterprise evaluations.
- Established connected ecosystem linking CSM to 3+ ServiceNow apps, improving data flow and customer lifecycle tracking.
- Designed end-to-end B2B onboarding workflows reducing customer TTV by 40% across 150+ MSP implementations.
- Created scalable data import pipelines processing 100K+ records monthly, enabling seamless enterprise onboarding.
- Aligned onboarding telemetry with renewal metrics, reducing lifecycle handoff friction and improving NRR by 8 points.

Zaggle Prepaid Ocean Services, Hyderabad

April 2022 – June 2022

Product Management Intern

- Designed B2B customer onboarding workflows for Expense Management platform, reducing support team workload.
- Built interactive ROI calculator enabling prospects to quantify savings, increasing trial conversion requests by 35%.
- Conducted 46-feature competitive analysis across 5 players, identifying whitespace opportunities for product roadmap.

MyScoot Tech Pvt. Ltd., Gurugram (Y combinator backed)

Feb 2019 – June 2021

Business Analyst

- Owned end-to-end data operations at Y Combinator-backed startup, supporting 3x user growth over 28-month tenure.
- Designed 15+ interactive dashboards for C-suite and ops teams, driving data-driven decisions across the startup.
- Analysed feature launches and marketing campaigns, identifying optimizations that improved conversion rates by 25%.
